

Repair Order

Intelligent Workflows for Every Repair

Take charge of every repair—overhauls, calibrations, inspections, and more. Streamline every stage of the repair process – from creating orders and assigning vendors to tracking costs and closing transactions, all with full visibility into components, timelines, and service status.

Capabilities That Drive Faster, Smarter Repairs

End-to-End Repair Tracking

- Build and manage repair orders effortlessly from a single, connected workspace.
- Monitor service progress and vendor communications in real time.
- Maintain compliance with required documentation and audit records.

Flexible Service Management

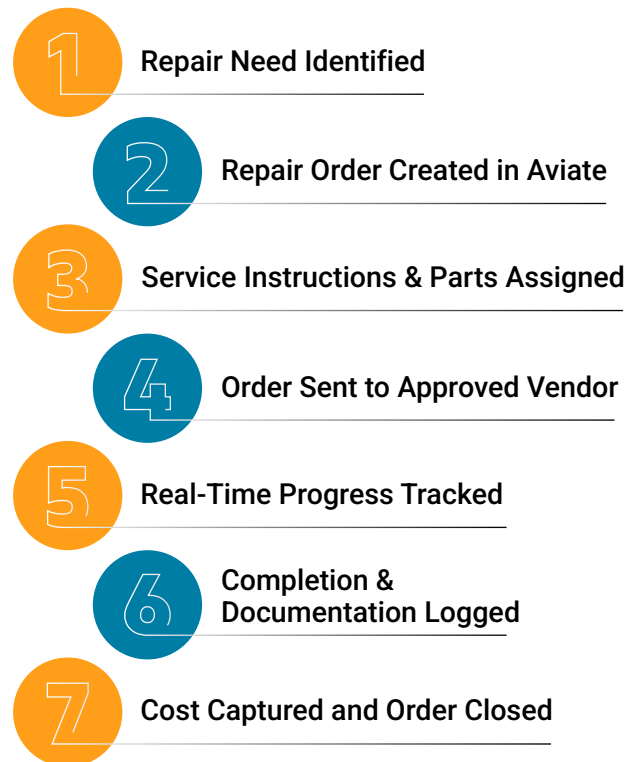

- Support multiple repair types including overhaul, calibration, and inspections.
- Link individual components or sub-parts to each order to streamline servicing.
- Define service-specific requirements and instructions for clear vendor execution.

Seamless Vendor Coordination

- Route repair jobs to approved vendors using built-in workflow logic.
- View real-time repair status, associated costs, and turnaround expectations.
- Automate communication, order delivery, and document sharing.

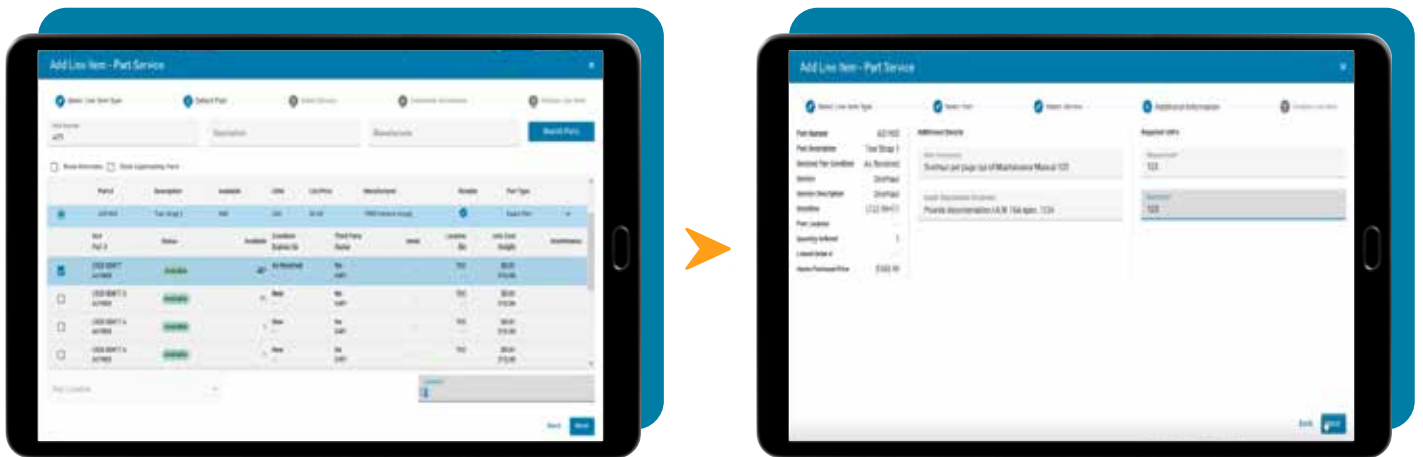

Accurate Cost & Compliance Tracking

- Record and track repair-related costs directly within the order.
- Capture all required compliance details and service certifications effortlessly.
- Preserve detailed service records to support traceability and audit readiness.

The Repair Journey

Repair Order

Repair Operations, Streamlined

- ➔ **Faster Turnarounds:** Accelerate service timelines with real-time repair visibility and vendor alignment.
- ➔ **Greater Service Accuracy:** Attach parts, instructions, and records for error-free repair execution.
- ➔ **Full Cost Control:** Track repair costs as part of the workflow to maintain budget oversight.
- ➔ **Built-In Compliance:** Ensure documentation and certifications are in place for every repair.
- ➔ **Total Repair Visibility:** Monitor every step of the repair lifecycle to reduce downtime and improve planning.
