

Better Communication, Seamless Maintenance

Elevate your customer's service experience with an interactive customer-facing app, keeping decision makers connected at every step of the maintenance process, from quotation and work order status, to discrepancy reviews/approvals and records delivery.

Key Features

Real-Time Work Progress and Status Updates

Reduce service time by keeping customers informed with real-time updates on their aircraft maintenance status, eliminating delays in approvals.

Embedded Chat Functions

Enable seamless communication through embedded chat functions, allowing customers to view photos, videos, and private notes, all in real-time.

Quote vs. Invoice Comparison

Provide a consolidated view of quotes and work orders, allowing customers to easily compare quotes against invoices for complete transparency.

Electronic Quote Approvals and Change Order Management

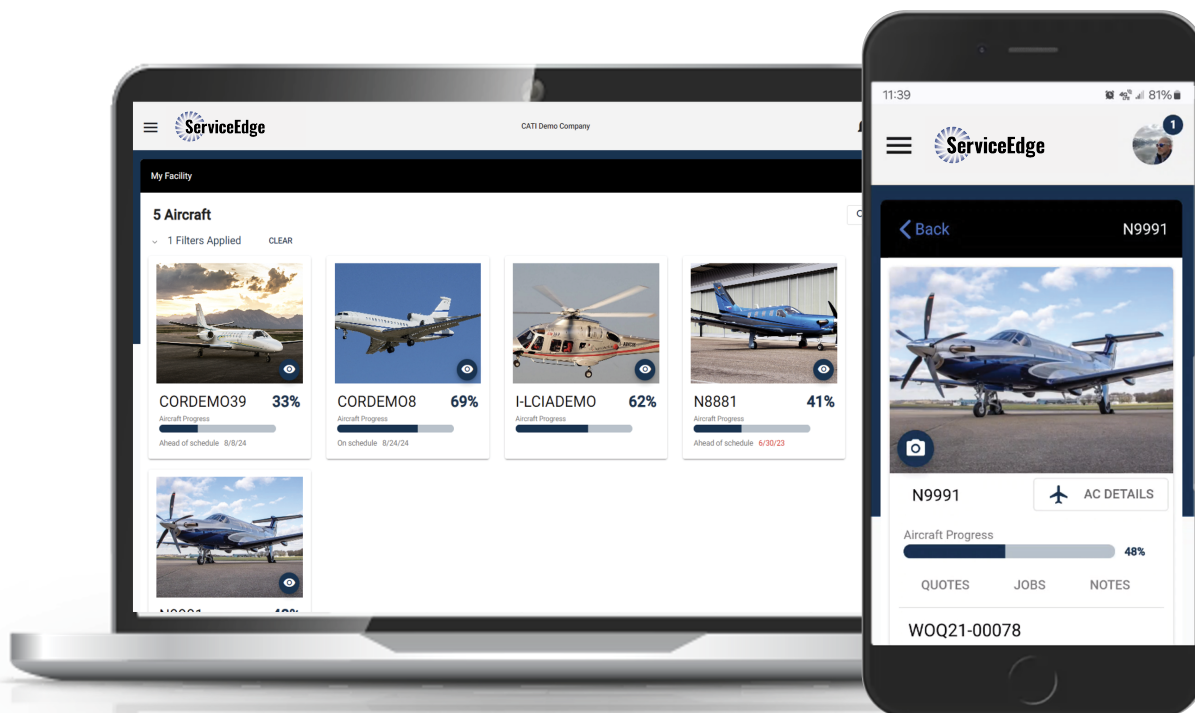

Empower your customers to manage their aircraft service by simplifying the approval process for quotes and change orders, and efficiently handling discrepancies.

In-App, Text (SMS), & Email Notifications

Keep customers updated with timely in-app, text (SMS), and email notifications, ensuring they are always informed about service activities and interactions.

Remote Service Management

Eliminate the need for on-site customer representatives by providing a comprehensive, interactive platform for managing aircraft service remotely.

Improving the Service Center and Owner/Operator feedback loop!

- ✈ Work Progress and Status Updates
